Gas Leakage and Alerting System

Empathy Map Canvas

Think and feel?

Set Alarm

IOT knowledge

How to avoid leakage

Ensure safety

Instruments damage

Hear?

App to alert

Improper maintainence

See?

Precautions to be taken

Human errors

Can be implementedd in all places where gases are used

Avoid industry and human life losses

A necessary Inovation in our daily life

Say and Do?

Pain

| Unavailability of Human resources constantly | Cannot be able to detect gases at initial stages | Implementation and maitainance should be cautious |

Gain

| Regular monitoring | Alerting incase of any leakage | Prevent from explosions |
